FACE-SZ DATA SUMMARY

FondaMental Advanced Center of Expertise – Schizophrenia

FACE-SZ (FondaMental Advanced Center of Expertise – Schizophrenia) is a clinical database built from the computerized medical records of the FondaMental Expert Centers for Schizophrenia.

This summary is intended for all teams wishing to access the **FACE-SZ** database data to implement, develop, or promote a research project. It summarizes, in a non-exhaustive manner, all the data available in the **FACE-SZ** database, classified by major themes.

The Charter for Access to FACE/BioFACE/PSY-COH Data and Samples and Publication Rules, available on the FondaMental Foundation website, describes the data access process.
